

ANNUAL REPORT

2024 marked many milestones for APHL. The association moved to its new headquarters in Bethesda, Maryland and hosted 75 meetings in its first year. Our longest international partnership in Kenya also opened a new headquarters office, enabling our in-country staff to continue serving the public health community. Our Career Pathways in Public Health Laboratory Science: an APHL-CDC Initiative celebrated four years of bringing new faces into our public health laboratory community.

As we continue our critical work, we are profoundly grateful for the support of our members and federal partners—including (but not limited to) US Centers for Disease Control and Prevention (CDC), the US Food and Drug Administration, the US Health Resources and Services Administration and the US Environmental Protection Agency—and all our public and private collaborators.

BY THE NUMBERS

As an association, we understand that innovation is vital to growing our public health community. Through APHL's programs and initiatives, we continue to support our members and their public health partners in accomplishing their day-to-day missions, as well as planning for the future.

15
Laboratory Leaders of Today graduates joined 50+ LLOT alumni

14 
Emerging Leader Program graduates joined the 200+ Emerging Leader Alumni Network

18,000
participant engagements in workshops, conferences, eLearning courses and webinars

23,100
P.A.C.E.® continuing education credits earned

5,750+
members and partners engaged in committees, subcommittees, workgroups, taskforces, communities of practice and user groups
